ABOUT US :

Golden Dyechem is a leading supplier of high-quality chemicals, catering to diverse industries with innovative solutions.

With years of expertise, we ensure premium-grade products that meet global standards.

Our commitment to quality, sustainability and customer satisfaction drives our growth.

WHY CHOOSE US :

- Industry-Specific Solutions
- Sustainable Practices
- Premium Quality Chemicals
- Global Standard Compliance
- On-Time Deliveries
- Customized Chemical Solutions
- Strong R&D Capabilities
- Expert Technical Support

INDUSTRIES WE SERVE:

Textile Industry

Pharma Industry

Pesticides Industry

Paint Industry

Unsaturated Polyester Resin

Polyurethane

Inks & Varnishes

Adhesives

Oil and Exploration

Paper Industry

Packaging

Lubricants

Plasticizers

Our Products

PURIFIED ISOPHTHALIC ACID

Application :

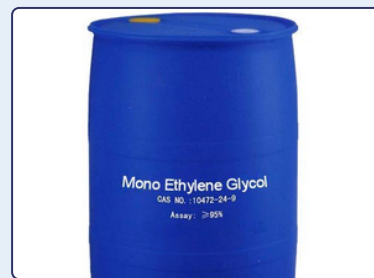

Used in PET bottles, coatings and high-performance resins for enhanced durability.

PURIFIED TEREPHTHALIC ACID

Application :

Essential for polyester fiber, films and packaging, ensuring strength and clarity.

MONO ETHYLENE GLYCOL

Application :

Key component in antifreeze, polyester production and coolants for industrial applications.

DI ETHYLENE GLYCOL

Application :

Used in adhesives, lubricants and plasticizers for improved flexibility and stability.

TRI ETHYLENE GLYCOL

Application :

Applied in air sanitization, dehumidification and as a solvent in various industries.

PROPYLENE GLYCOL

Application :

Found in food, cosmetics and pharmaceuticals as a safe and effective moisture-retainer.

GUM ROSIN

Application :

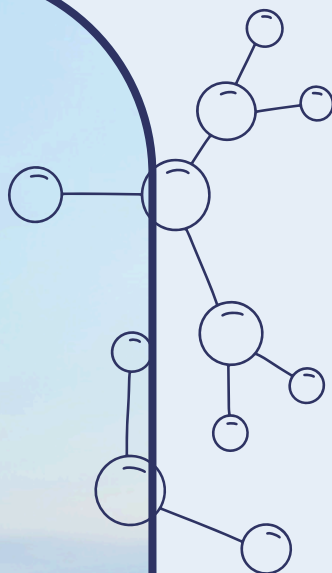

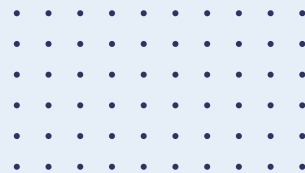

Used in adhesives, inks and coatings for superior tackiness and film-forming properties.

PARAFFIN WAXES

Application :

Widely used in candles, cosmetics and waterproof coatings for smooth and long-lasting effects.
